Robot Vacuums

A robot vacuum is a little disc that cleans your floors all by itself.

The five worth knowing

Roborock Qrevo Curv — best overall

The do-everything pick: strong vacuuming, very good mopping with spinning mop pads, and a dock that empties the dustbin, washes and dries the mop pads, and refills its water — all by itself. Premium price, but it is often on sale now that newer models are out — the sales make it a much easier yes.

Roborock Q7 M5 — best budget

The simple, affordable way in: reliable cleaning and accurate room mapping for a fraction of the flagship price, with a small charge-only dock. The trade-off is no self-emptying base on the standard model — you empty its bin yourself — and the mopping is basic.

Dreame L40 Ultra — best for pet hair

Built for homes with shedding pets: strong suction that pulls hair out of carpet, and a big dock bin so you are not changing bags constantly. Its mopping pads stay in the dock when they are not needed and lift away from carpet.

Eureka J20 — best for hard floors

If your home is mostly tile or hardwood, this is the mopping champion: a roller mop that constantly rinses itself with clean water instead of pushing dirty water around. Premium price, and the dock is on the bulky side — give it a permanent parking spot.

iRobot Roomba Combo j9+ — the familiar name

Roomba is the name everyone knows. This one vacuums and mops, empties itself into its Clean Base, and its mop pad flips up out of the way on carpet. It is famously good at dodging pet waste. One honest note: iRobot went through bankruptcy in late 2025 and is now under new ownership. Existing Roombas still work fine and new models are still being sold — just buy from a store with a good return policy.

What matters most for seniors

A Wi-Fi pairing tip. Robot vacuums connect to the 2.4 GHz flavor of your Wi-Fi, not the faster 5 GHz one. If pairing keeps failing, that is almost always why — Sean sorts this out in minutes.

When to call Sean instead

- Choosing between models before you buy — bring your floor plan and Sean will match the right one.
- Wi-Fi pairing that will not cooperate, or an app that keeps asking for things you do not understand.
- Setting up schedules, no-go zones, and room-by-room cleaning the easy way.

Call Sean at (813) 770-6082.
